01

Introduction

Arcadia Adjustable Louvered Roofs are manufactured entirely in the U.S.A. using recycled aluminum and stainless steel components for a low maintenance, long-lasting product. Our system is engineered to withstand high winds and heavy snow loads.

Arcadia's louvered roof system is ideal for any outdoor living area such as patios, decks, lanais, verandas, entry ways, courtyards, outdoor kitchens, swimming pools and spas. A variety of colors, materials and finishes are available to compliment any architectural style. Units can be free-standing or attached to existing structures to enhance any area requiring convenient sun weather control.

ADVANCED TECHNOLOGY

We're constantly perfecting our product through applying advanced technology, design, and building highly personalized, luxury louvered roofs of extraordinary quality.

02

Versatile

At Arcadia there is a simple philosophy – if it can be done, it will be. Here, truly amazing designs can be created to meet your exact requirements, however demanding, unusual, or even eccentric.

It's our desire to make your already unique louvered roof one of a kind. With so many options and limitless possibilities how do you know where to begin?

The process really begins here. In these pages lies a rich selection of features giving you the freedom to handpick the exact enhancements to make it truly your own.

Whichever you choose - your journey begins here.

CUSTOMIZABLE

Every Arcadia system adapts to any architecture allowing for a completely customizable installation.

03

Extruded Aluminum

IT'S LIGHTWEIGHT

Aluminum weighs less by volume than most other metals and materials.

IT'S STRONG

Aluminum profiles can be made as strong as needed for most applications.

IT'S NON-CORROSIVE

Aluminum does not rust.

IT'S RESILIENT

Aluminum combines strength with flexibility and can flex under loads or spring back from the shock of impact.

IT'S REFLECTIVE

Highly reflective aluminum can be used to shield products or areas from light, radio waves, or infrared radiation.

IT'S NON-COMBUSTIBLE

Aluminum does not burn and, even at extremely high temperatures, it does not produce toxic fumes.

IT'S RECYCLABLE

Aluminum retains a high scrap value. It can be recycled indefinitely without losing any of its superior characteristics.

IT ACCEPTS FINISHES

Aluminum can be finished with a variety of common techniques, including liquid paint, powder coatings, anodizing, or electroplating.

*6063-T6 Aluminum (All extrusions manufactured following Aluminum Association tolerances and to meet ASTM standards.)

WITH STRENGTH COMES DURABILITY.

The only fully extruded aluminum louvered roof system on the market today.

04

High-Quality Building Materials

Each Arcadia system is a work of art, constructed with care and attention to every little detail.

Our system is powered coated, extruded aluminum with stainless steel components giving us the most durable louvered roof on the market today. From our superior drive system, which is UL & CE certified, down to the stainless steel tex screws that secures the system together. Nothing but the best!

Our low-maintenance components eliminate painting, staining, and waterproofing of traditional shading structures. Using powder-coated aluminum construction prevents warping, cracking, and corrosion.

05

Color Options

The Arcadia system features four (4) standard color options that compliment almost any architecture. For those unique applications we do have available thousands of custom colors. A chemical textured powder coat makes a more scratch-resistant surface, while giving it a flatter finish that is driving the outdoor color pallet of today.

06

Gutter System

When our louvers are in the closed position, they create rain channels. With a slight pitch, the rainwater is directed into the built-in gutter system. Our patented gutter corner pieces make installation a snap, while giving the system a distinct elegant look.

07

Range of Motion

Industry-leading linear drive system, smooth and efficient. Operate from zero to almost 170° and stop anywhere in between for complete control over your environment.

System Operations

The patented Arcadia system has a full complement of advanced technology both within the system as well as driving the operational controls. Everything is designed to work in unison. The result is fingertip control and a dynamic connection with your outdoor space.

09

We Think Green

ECO-FRIENDLY CONSTRUCTION

The Arcadia system is made up of recycled aluminum making it an extremely Green product. The louvers can be oriented in any direction desirable for maximum control over sunlight. Sun can be let through in the winter to provide solar heat gain, and blocked in the summer months to provide energy-saving shade.

ENVIRONMENTAL INNOVATION AT ARCADIA

Arcadia is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its drive system and designs, Arcadia is committed to operating as a more sustainable business and reducing its overall environmental impact.

10

Limited Lifetime Warranty

Products carry the warranty specified for that category.
